▶ **Additional Information**
This class comes with a 100% Satisfaction Guarantee, provides AIA/CES Continuing Education Credits (CEU's), and each student receives a certificate of completion. Please see our website for more information.

DESCRIPTION

Go beyond the basics of Revit® and take your skills to the next level with this progressive half-day class. Focusing on the modification of “out of the box” hosted families, learn about the hosting behavior of face-based families, convert wall-based families to face-based, embed detail items and annotation symbols for symbolic representations, and provide a symbol offset to stack devices in plan view.
