

ONE-ON-ONE INSTRUCTION

NOT ALL TRAINING HAPPENS IN THE CLASSROOM

Schedules are tighter than ever and sometimes you need more concise instruction than you can get in a traditional training class. Working at your desk is often the best way to learn something new.

OVER THE SHOULDER TRAINING TO CHECK OFF YOUR LIST OF QUESTIONS

CADD Microsystems consultants can work with you side-by-side as you work from the comfort of your office learning new software or procedures. This allows you to skip topics that you don't need and focus on the specific skills that you know you need to develop.

DEFINE A CUSTOM TRAINING TRACK AHEAD OF TIME

Work with our team to build a syllabus that you know you need to tackle. We can pull from our library of existing course materials or build something customized for your needs.

THE FLEXIBILITY TO CHANGE COURSE

Need to zig when you were going to zag? Even while working with a preset outline, our consultants are always up for any question and challenge. The one-on-one instruction allows for that flexibility and on-the-spot adjustment.

WE CAN WORK WITH YOU TO ADDRESS WHAT YOU NEED TO LEARN

- **Foundation or gap training**
- **Continuing education**
- **Questions and answers**
- **Project specific instruction**
