### **CADD Microsystems Strengthens its Team With Key Promotions**

April 1, 2008 (Alexandria, VA) — CADD Microsystems, Inc. (CMI) is pleased to announce three key promotions within the company. As it continues to grow and expand its services, CMI is ensuring that the best people are on hand to support its customers' business needs.

As customer demand increases and shifts to adapt to the changing industry, the promotions will help strengthen the customer support systems in both the Virginia and Maryland offices.

Jeff Anselene was promoted to vice president, commercial sales, managing all commercial sales for CMI. Jeff oversees the entire commercial sales team, ensuring that CMI is meeting customer demands, Autodesk demands and internal CMI objectives. Jeff has been with CADD Microsystems for more than six years and previously had been an account executive covering commercial clients in the mid-Atlantic region.

Jessica Miller was promoted to account executive after two years with the company, and manages all commercial Maryland accounts, working out of the Baltimore office. Jessica's prior work experience included four years as a sales representative at a local reprographics solution provider, and the design industry expertise she brought to CMI is a great benefit to her customers.

Brett Thompson was promoted to account executive after two years with the company, and manages Washington, D.C. accounts out of the Virginia office. He joined CMI supporting the sales team and helping customers. Prior to CMI, Brett worked at Northrop Grumman as an IT order manager and inside sales representative.

"These promotions go a long way in securing CADD Microsystems as the leading Autodesk solution provider in the region," said Jeff Gravatte, CEO of CADD Microsystems. "We have the right people in the right place to better serve the growing customer demand and address the modeling paradigm shift we are seeing in the architecture, engineering and construction industries."

With these changes, CADD Microsystems is poised to offer even greater service and technology leadership to help its customers fulfill their design technology needs.

#### **About CADD Microsystems, Inc.**

CADD Microsystems, Inc. is an Autodesk Premier Solution Provider in Civil Engineering, Building Architecture, Federal Government, and State and Local Government, with more than 21 years of experience with architectural, engineering and construction design software solutions. Staffed with Registered Architects and LEED certified consultants, CMI collaborates with customers from needs analysis through implementation, including process consulting, data migration, custom development and training. CMI has been the number one Autodesk federal dealer since 1991, and works closely with federal, state and local government agencies as well as commercial

design firms to provide solutions in support of Building Information Modeling and other mission critical objectives. Learn more at [www.caddmicro.com](http://www.caddmicro.com).
